

- All plan dimensions are measured to the inside of the posts.

- Panel height measurement includes Top and Bottom Rail.

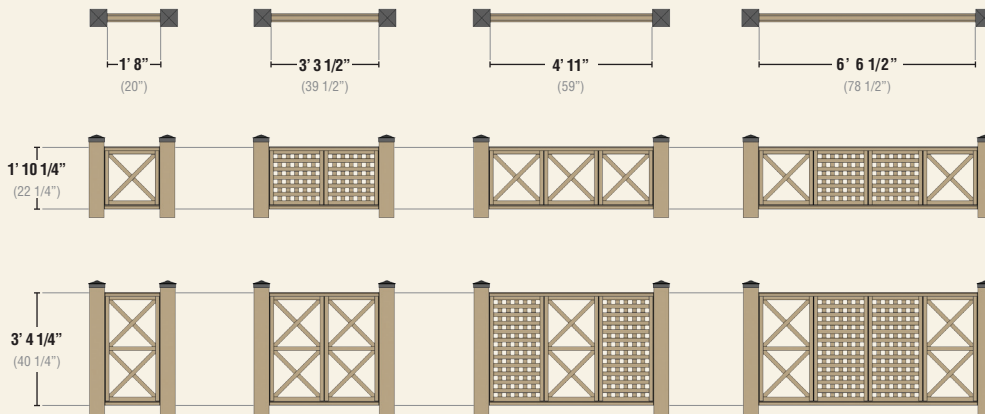

- Elevation from ground not included.

- Suggested post height is 3" above the Top Rail and 3" from the ground to the Bottom Rail.

- Maximum panel configuration is 4 panels high by 4 panels wide.

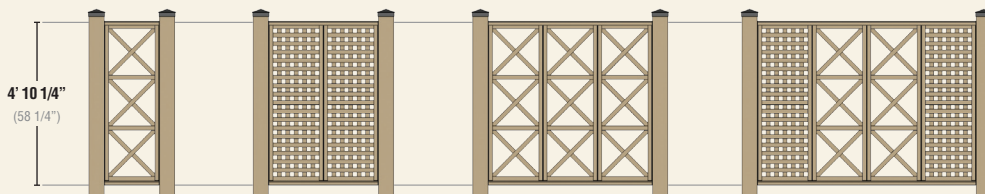

Note:

There are 2 methods for creating Three High Panels, use only 1 method consistently throughout entire design.

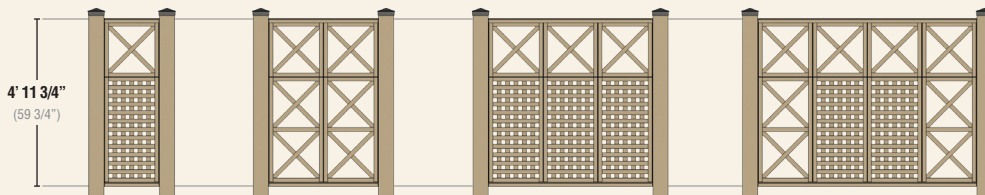

***Methods for creating Three High Panels:**

Method 1: Use Three High Panels

Method 2: Use Two High Panel with Topper

*Use only 1 method consistently throughout entire design.
